# LEGAL DISCLAIMER

The information in this presentation is provided in summary form only and does not purport to be complete. This presentation does not contain all the information that is or may be material to investors or potential investors and should not be considered as advice or a recommendation to investors or potential investors in respect of the holding, purchasing or selling of securities or other financial instruments. This presentation was prepared mainly for the sake of brevity and convenience and is not intended to describe the Company's activities fully and in detail, it does not replace the Company's reports, and it should be read together with the reports published by the Company, from time to time, through MAGNA website.

This presentation may include information that was not presented in the Company's reports and/or data presented in a manner and/or characterization and/or segmentation different from those presented in its reports (especially in slides 13 and 17). The presentation may include forward-looking statement within the meaning of the Israeli Securities Law, 1968. Such forward looking statements with respect to strategies and other aspects of the businesses of Company are based on current expectations that are subject to risks and uncertainties. Various important factors could cause actual results or events to differ materially from those that may be expressed or implied by the forward-looking statements, including without limitation, changes in market conditions, regulation and climate, violation of obligations towards the company and difficulties in production. The Company has no certainty that these forecasts and/or estimates will be realized, in whole or in part, and this is due, among other things, to factors beyond its control, changes in market conditions and the environment, regulatory changes or the realization of some of the Company's (or its subsidiary) risk factors as included in the company's annual report for 2022 as published on March 31, 2023 (2023-01-036792)

The Company does not undertake to update the information contained in the presentation, in whole or in part. This presentation is for informational purposes only and does not constitute an offer to sell, a solicitation of an offer to buy, or a recommendation to purchase any equity, debt or other financial instruments of the Company. Any person at any time acquiring securities must do so only on the basis of such person's own judgment as to the merits or the suitability of the securities for its purpose and only based on such information as is contained in such public filings, after having taken all such professional or other advice as it considers necessary or appropriate in the circumstances.

We are

# MIA DYNAMICS

Mia Dynamics is revolutionizing the micro-mobility sector with cutting-edge, patented technologies, advanced mechanical dynamics, and extensive industry experience. These capabilities deliver breakthrough innovation, driving significant shifts in market trends.

Our solutions enable smart thinking that enhances safety and performance in small vehicles, while also providing an exciting and innovative riding experience. By integrating these advanced technologies, we are reshaping the future of micro-mobility with a focus on both security and exhilaration.

**MIA**  
**FOUR**

# OUR INNOVATION

Traditional four-wheel technology requires a very wide wheelbase and a low center of gravity to achieve high performance with an acceptable level of rider safety.

The Mia Dynamics Quad Wheel platform delivers a high-performance experience without compromising rider safety.

Our inspiration is to emulate the performance of two-wheel technology while retaining the stability and traction of a four-wheel platform.

# TWO WHEEL ABILITY QUAD WHEEL STABILITY!

## Green

A green vehicle (EV) with a max range of 100km via a removable battery + Low Noise emission

## Safety First

The four wheels combined with the unique MIA Dynamics platform provide maximum traction & stability resulting in a new standard of rider safety for a stand-up Micro ATV

## Dynamic

A unique independent suspension for each wheel allows the MIA Four to negotiate challenging terrain and transition seamlessly from urban commuting to off-road gravel trekking.

## Efficient

The folded handlebar and light weight allows easy and efficient transportation and storage

Make it anywhere

# A New Standard

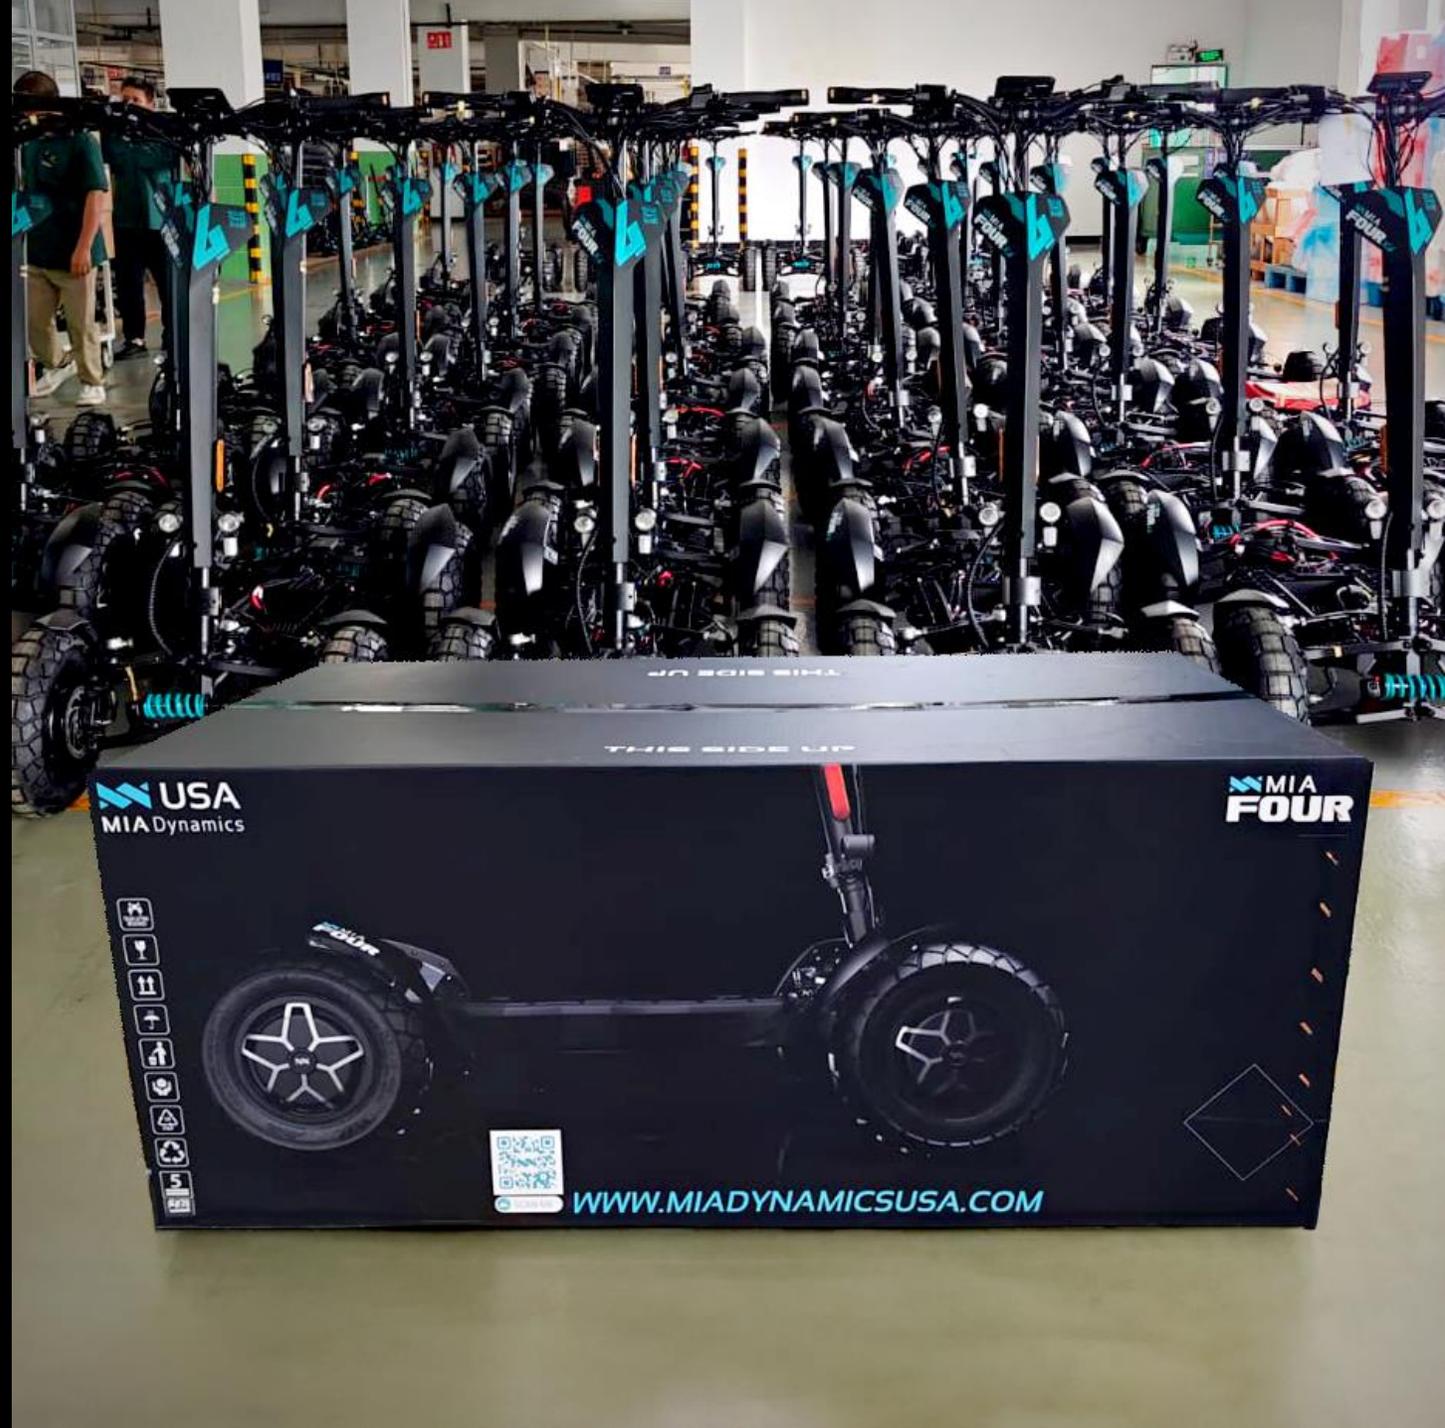

Efficiency and Functionality for urban and off-road purposes

## QUALITY STANDARDS

**SGS**

SGS is a Swiss multinational company headquartered in Geneva, which provides inspection, verification, testing and certification services. It has more than 96,000 employees and operates over 2,600 offices and laboratories worldwide.

## B2C | Experience and Leisure

---

Currently, many customers are enjoying our products. Our goal is to develop an international network of distributors to facilitate the purchase of our products. At this stage, purchases will be made through these distributors, allowing for test rides, hands-on experiences, learning to ride, and ongoing service even after the purchase.

# B2C | EXPERIENCE AND LEISURE

## B2B | Urban & Off-Road Touring

---

We are already identifying tremendous potential in the tourism market. Our product, characterized by its green footprint, is lightweight, easy to transport, equipped with replaceable batteries, stable, safe, and highly enjoyable. Many tourists find it ideal for hourly or daily rentals for city tours or off-road trails. We are currently expanding into various locations around the world, continually growing this target market and establishing our vehicle as a leading option in the field.

# B2B | URBAN & OFF-ROAD TOURING

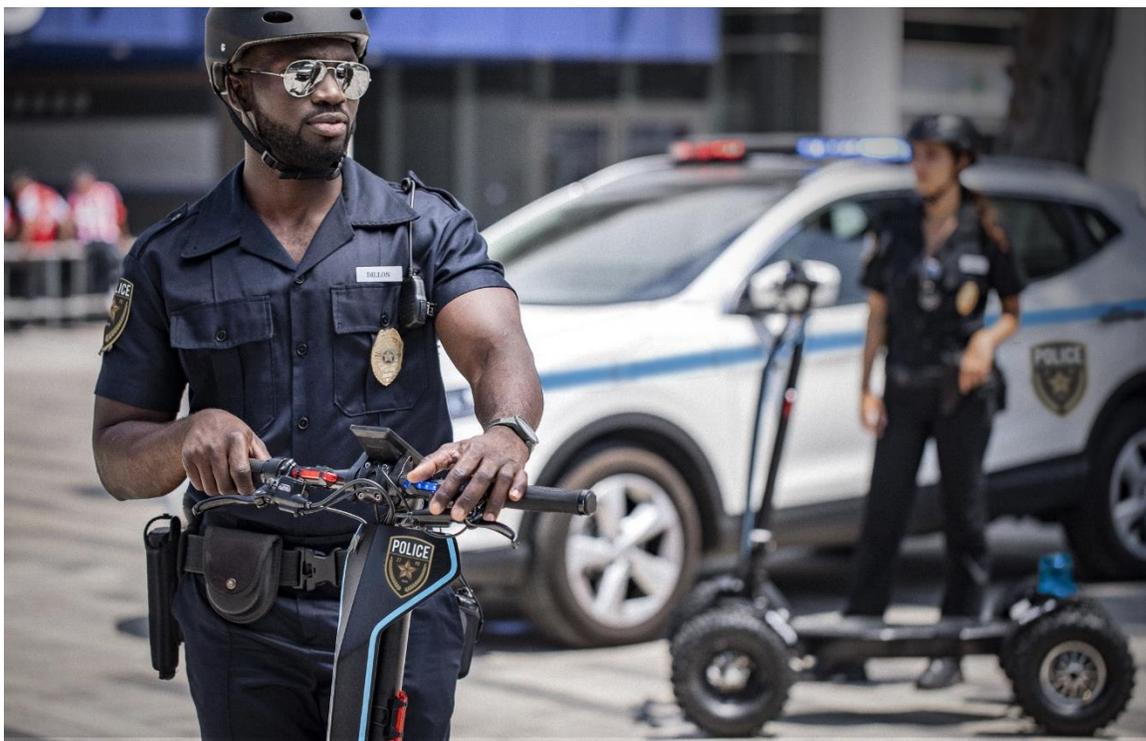

## B2B | First Responder & Security Patrol Applications

---

The ability of our vehicle to provide strong performance while being compact, relatively lightweight, and able to fit into a car trunk makes it highly appealing for the security and patrol sector. The Mia Four is a quiet and efficient vehicle, allowing for discreet operation in indoor environments. Its size provides a noticeable presence for security forces, while its narrow width enables access to pathways or alleys that other vehicles cannot navigate. Combined with its relatively low price compared to existing options in the category, it becomes an optimal choice for security or first aid applications in the field.

# B2B | FIRST RESPONDER & SECURITY PATROL APPLICATIONS

The ability to design and wrap the vehicles according to specific categories and modify their functionality allows for versatile applications. This customization ensures that the vehicles can be tailored to meet various operational needs and branding requirements.
